## HOUSINGS

Extruded aluminum profile in a 0.080-inch wall thickness. Maximum length of each linear component is 12-ft. .060 aluminum ends are provided where needed at row termini. A one-piece 14GA galvanized steel joiner/aligner bracket is provided for each joint between housings. Internal cold-rolled steel components. Standard or custom hanging points are provided. A custom formulated non-glare matte-white polyester powder coating provides an extremely durable and long-lasting finish. Custom color finishes on request.

## DIFFUSERS

Seamless fit diffusers. Flawless and consistent end-to-end fit. Extruded from custom formulated acrylic smooth opal material. Allows maximum light transmission while eliminating pixilation and hot spots. Standard diffuser is 1-2- inch drop style. Optional diffusers; 1-inch or 1-1/2-inch drop style or flat style. Smooth finish compliments the architectural elements.

## LED MODULES

High performance linear configured LED module boards. Each board consists of multiple mid-power, high efficacy LEDs in a precise layout eliminating the need for supplemental heat sinking. The boards produce an even and diffuse light which maximizes optical efficiency. Compatible with the dimming performance of the LED driver. Color temperatures available 80 CRI: 3000K, 3500K and 4000K. Upon request: 5000K. Color temperatures available 90 CRI: 2700K, 3000K, 3500K and 4000K.

## TUNABLE WHITE OPTION

## MOLEX- PoE DRIVER

The Molex CoreSync Programmable Smart LED Driver is a compact low voltage, DC/DC LED driver that can be programmed to specific power outputs, for driving Constant Current LED engines in a wide variety of light fixtures. Controlled, powered and integrated with a Molex CoreSync PoE Gateway.

This DC system provides 71.3 usable watts at the powered device, it operates at 52 VDC and has an amperage allowance 1.73 amps.

Using this product gives the end user the option of making their building a smart building combining IT and OT to one platform, while being able to control but not limited to cameras, shades, occupancy, traffic patterns and DLH.

## OPERATION - ELB

In the event of a power failure, PoE power source failure or disconnection of cabling, the module will bypass normal PoE control and activate the emergency power source. The fixture will power to full brightness and return to normal operation once the emergency has been cleared.

## CORNERS

Standard 90 degree corners. Custom angled corners.

## INSTALLATIONS

Designed to be suspended on cables. Specify **M**  
For direct surface mounting to most ceiling types, specify **M1** and consult factory.  
For stem mounting specify **M2** and consult factory.  
Lengths of 12-ft. and less to use one housing with two ends pre-installed.  
Lengths over 12-ft. will be engineered to job requirements using multiple housings with one end pre installed at each row end. Lengths over 12-ft. will include appropriate job required quick-connect plug-thru wire harnesses and housing joiners.
