THANK YOU FOR VISITING US.

We hope you enjoy learning about our latest lighting innovation.

LIGHTPOINTS

Downlights or other point source LED modules can add accents, drama or special architectural effects to our linear products.

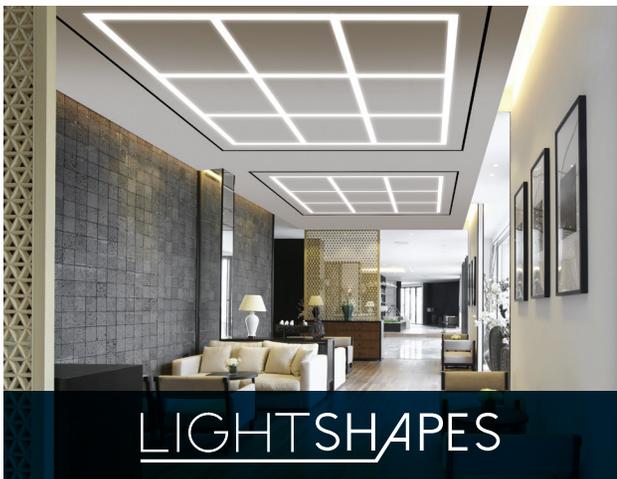

LIGHTCURVES

Our ability to curve our linear products offers exciting possibilities to lighting designers.

LIGHTCOVERS

Self-containing cove systems provide integral linear LED illumination built into beautiful sculptured coves.

LIGHTSHAPES

Standard and custom corners, crosses and T-sections allow the design of unlimited patterns, grids, shapes and runs.

LIGHTSTREAMS

Our original concept: architectural extruded aluminum linear LED luminaries for all installation types.

LIGHTSTREAMS FLEX

A simple, and secure modular lighting system that integrates with our standard LightStreams products. Easily slide, rotate and adjust your lights to changing room requirements.
